MY SKILLS

Front-End Development

Back-End Development

Databases

Testing and Debugging

Problem Solving

Version Control

Agile Methodologies

Strategic Planning

TOOLS

- Programming Languages: C#, JavaScript, TypeScript
- Web Technologies: HTML, CSS, Bootstrap, Tailwind CSS
- Front-End Frameworks/Libraries: React, Next.js
- Back-End Frameworks: ASP.NET, Entity Framework Core
- Databases: MySQL, SQL Server, PostgreSQL

WORK EXPERIENCE

SOFTWARE ENGINEER (INTERN)

PAYSTACK | OCT 2024 – FEB 2025

- Contributed to the development of AI-driven analytics tools designed to help businesses interpret operational data, generate automated reports, and gain industry insights.
- Worked within production-level engineering workflows, code reviews, and team collaboration processes.

FULLSTACK SOFTWARE ENGINEER

EQUIDACORE (UK) | AUG 2023 – JULY 2024

- REKLAIMÉ - Developed a recycling application that utilizes geo-tagging to identify and share recyclable materials found on construction sites with a team.
- EV - Worked with a team of experienced developers in developing an app that empowers users to efficiently run vehicle diagnostics and conveniently locate nearby charging stations.

FRONTEND DEVELOPER

ODDIERCE INC. | FEB 2023 – AUG 2023

- Collaborated closely with design and backend teams to implement seamless UI integration. Translated mockups into clean, cross-browser compatible front-end code. Engaged in Agile processes for timely delivery of high-quality software.

FULL STACK SOFTWARE ENGINEER

SYSBEAMS | JAN 2022 – JAN 2023

- Worked with a team of expert engineers in developing a system that allows IPPIS to take data of MDA employees and subsequently take biometrics capturing of these employees.
- Developed and managed a registration Portal for JALSA(an event that takes place annually).
- Improved usability performance, new features implementation, and fixed application bug issues.

BACKEND DEVELOPER

YUSCOMSOFT | APR 2021 – DEC 2021

- Developed Human Resources Management System with a team of engineers using Web API Services and .Net MVC.
- Worked with expert engineers in developing a university management system and result-processing

SELECTED PROJECTS

AZTRALLI – FULL STACK DEVELOPER

- Built a marketplace and logistics ecosystem focused on secure escrow-based transactions between buyers, sellers, and delivery partners. Contributed to features for trade management, delivery coordination, and secure payment workflows designed to improve trust and transaction reliability.

FUND IT – FULL STACK DEVELOPER

- Developed a crowdfunding platform that allows users to create donation campaigns with images, funding goals, and campaign descriptions. Implemented secure payment processing and a wallet system enabling campaign owners to receive and withdraw donated funds. Built campaign sharing and public donation flows to improve accessibility and user engagement.

ATLAXA – FRONTEND DEVELOPER

- Built a marketplace platform showcasing African-made products and empowering local artisans and entrepreneurs to reach global buyers.

EASY STATEMENTS – FRONTEND DEVELOPER

- Developed an AI-powered platform that helps students generate university application statements using voice input and AI processing.

EDUCATION HISTORY

Bachelor Of Science: Computer Science

Ladoke Akintola University, Ogbomosho.
